MWS LIGHT SHELF INSTALLATION

When attaching Light Shelf to ModWall Panel, make sure the attachment screws are adjusted for a tight fitment.

NANO INSTALL INSTRUCTIONS ON BACK.

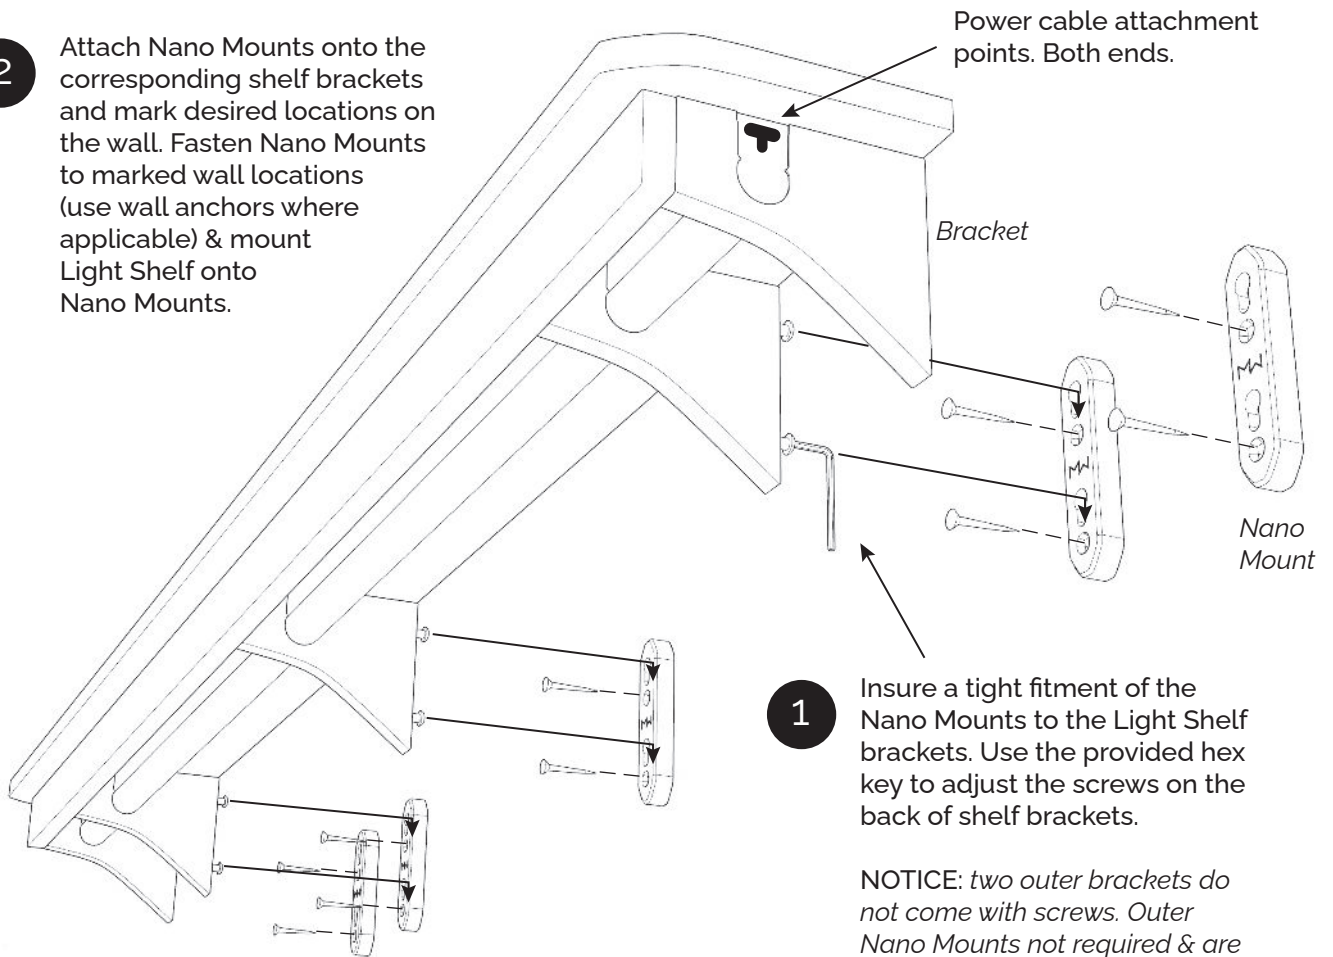

MODWALL LIGHT SHELF X NANO INSTALLATION

When attaching Light Shelf to ModWall Nano mounts, precise measuring is required for proper alignment. Using a level and measuring tape is highly recommended for this task.

2

Attach Nano Mounts onto the corresponding shelf brackets and mark desired locations on the wall. Fasten Nano Mounts to marked wall locations (use wall anchors where applicable) & mount Light Shelf onto Nano Mounts.

1

Insure a tight fitment of the Nano Mounts to the Light Shelf brackets. Use the provided hex key to adjust the screws on the back of shelf brackets.

NOTICE: two outer brackets do not come with screws. Outer Nano Mounts not required & are simply for ideal appearance.

Share your setup with us and the world!
